

PHILLIPS HB 6519

I am a Connecticut farmer and am writing to lend my support for the 2013 GMO labeling bill. I am morally opposed to the creation of genetically modified life forms. I am opposed to the idea of corporations owning life on earth through patents and intellectual property rights. These actions amount to a slavery of life. If there is a possibility that these life forms are in foods my family eats, labeling would assist me in making the choice to avoid those foods.

Sincerely,

Rodger Phillips
